

# ***For a very different experience!***

*If you enjoy music from Blur to Beethoven, dance from ballet to hip hop, theatre, musicals, circus, comedy or any other kind of performance, check out our charity - **BAPAM** – the only organisation specialising in performing artists' health.*

*We run assessment clinics for student and professional performing artists across Britain and are now seeking a general practitioner (or occupational health or sports medicine specialist) to start a service in Liverpool.*

*This is occasional work (probably for two or three hours, from once a fortnight to once a month). Many of our clinicians are volunteers, but we do pay up to £40/hour if wished. We provide support and training and a window to a fascinating area of medical practice. For more information or to apply to work with BAPAM, call **Clare** on **020 7404 5888***
